All Heads of Institutions

### Revised Essential NCD Medicine List (2022) to manage NCDs at Primary Health Care Institutions

The NCD Technical Working Group consisting of relevant representatives from professional colleges has updated the National Management Guidelines for Primary Health Care providers on Diabetes, Hypertension, Cardiovascular Diseases, Chronic Respiratory Diseases and Dyslipidaemia.

Considering the unavailability of some essential drugs of the updated National Management Guidelines for Primary Health Care providers, the Directorate of Non-Communicable Diseases with the guidance of the NCD Technical Working Group revised the essential NCD related drug list for primary healthcare level which was published in 2017 (NCD/57/2017 dated 2017/12/05).

Please find the revised essential NCD related drug list (2022) attached herewith for your information. You are kindly requested to make necessary arrangements to ensure the availability of the essential NCD related drugs in all Primary Health Care Institutions.

Please bring the contents of this guideline to the notice of all relevant staff at your institution, district or province.

Dr. Asela Gunawardena

Director General of Health Services
